

Need expert support with a Unity API custom application implementation, or an experienced resource to manage your ADP Certification process?

Allscripts Integration Support Services

Look to EHR Integration Services (EHRis) in collaboration with Byte Sized Solutions (BSS) to help manage these complex and time-consuming technical projects.

Whether you're an Allscripts TouchWorks® EHR or Allscripts Professional EHR™ provider organization who's developed a valued custom application; or, a 3rd party vendor with an exciting new add-on application ready to go through the Allscripts ADP Certification process, EHRis and BSS can help manage your project efficiently, and cost effectively.

Our Credentials:

- > **Introduced three ADP Certified applications** currently successfully installed and used in scores of Allscripts clients across the country.
- > **Assisted >40 provider organizations** in implementing custom applications into Allscripts TouchWorks EHR and Allscripts Professional EHRs.
- > **Successfully managed >10 3rd Party Vendor applications** through the ADP Certification process, start-to-finish.

We understand your needs. We understand the integration, implementation and project management skills required for any Allscripts EHR add-on application project. And, we have a proven track record to support our position.
