

EHR Integration Services Integrates the Phreesia Point-Of-Service Solution into GE Centricity Group Management Systems

Phreesia and EHR Integration Services created an enterprise solution to automate the process of reconciliation, posting, financial reporting and collections at the point-of-service, with an integrated package for Centricity Group Management clients

EHR Integration Services Provides an Experienced Team and Seamless Integration Process

With a great deal of experience in the Centricity Group Management world, our skilled consultants approach system integration with focus on improving the way you work. We look for ways to create operational efficiencies, reduce tedious tasks and provide the critical information you need when and where you need it. Of course this is done with an eye on improving patient care, while helping you maintain profitability. It's all a part of what we call our Perfect Practice data services.

Phreesia is the Market Leader in Healthcare Point-of-Service

Recognized as the market leader and innovator in healthcare point-of-service, Phreesia serves enterprise healthcare practices across the country. The secure HIPAA- and PCI-compliant platform integrates with Allscripts and Centricity to drive results for practices: increase in cash flow of 10%, reduction in staff time per patient, greater operational and financial control through workflow integration and enhanced reporting. Each year, millions of patients use Phreesia and rate their experience with 93% satisfaction

About Phreesia

Phreesia, the leader in healthcare point-of-service, streamlines the intake process, helping medical practices increase cash flow and save staff time. Phreesia allows medical practices to effortlessly collect comprehensive patient information, verify insurance in real time, and collect payments both at the point of service and outside of the office. Phreesia also helps practices better identify and manage patients with chronic conditions by digitizing the administration of risk assessments, and ensuring that those screenings are completed, documented and fully reimbursed. Phreesia delivers fully interactive content direct to patients, and is designed to interface with clinicians’ existing and future technology. It is committed to enhancing the patient experience and enabling clinicians to stay at the forefront of patient care.
